605.486 – Android Development

Module 10d

View Animation

View Animation

- Types
  - Rotation, Translation, Scaling, Alpha, Sets…
- Interpolators
  - Linear, Accelerate, Decelerate, Overshoot…

Animation Example (Code)

```
Animation animation = new RotateAnimation(0, 360, getWidth()/2, getHeight()/2);
animation.setRepeatCount(Animation.INFINITE);
animation.setRepeatCount(3);
animation.setRepeatMode(Animation.REVERSE);
animation.setInterpolator(new AccelerateDecelerateInterpolator());
    // animation.setInterpolator(new LinearInterpolator());
animation.setDuration(3000);

startAnimation(animation);
```

Animation Example (XML / Code)

```xml
<alpha
    xmlns:android="http://schemas.android.com/apk/res/android"
    android:fromAlpha="1.0"
    android:toAlpha="0.0"
    android:duration="3000"
    android:interpolator="@android:anim/accelerate_interpolator"
    android:repeatCount="infinite"
    />
```

```java
final Animation animation =
        AnimationUtils.loadAnimation(getContext(), R.anim.alpha);

startAnimation(animation);
```

Animation Set

- Combine multiple animations

```xml
<?xml version="1.0" encoding="utf-8"?>
<set
    xmlns:android="http://schemas.android.com/apk/res/android">

<alpha
    android:fromAlpha="1.0"
    android:toAlpha="0.5"
    android:duration="3000"
    android:interpolator="@android:anim/accelerate_interpolator"
    />
<rotate
    android:fromDegrees="0"
    android:toDegrees="360"
    android:startOffset="1500"
    android:pivotX="50%"
    android:pivotY="50%"
    android:duration="3000"
    />
</set>
```
